

**Mounque Barazone's Geotextile Apparatus Co. Announces New Upgrades for
The Grizzly 600T and Grizzly Cub 300T Geosynthetic Installation Machines**
UPGRADES ARE AVAILABLE FOR ALL MACHINES. AFTER 41 YEARS WE ARE ALWAYS IMPROVING!

gacco@outlook.com · www.gacco.com · 1-619-222-5111

**Prices on steel and parts has been changing so rapidly I gave up having prices here.
I would be changing them weekly. Please see the Price Pages for Machines and Parts.**

PATENT PENDING ARTICULATION CENTER BRUSH MOUNT WITH 4 POSITIONS

The old mount had 2 fixed positions 1. Straight. 2. Patented Chevron Angle. The post has 3 height adjustment holes. The rear mounting tabs are removed and now welded onto a sliding tube with a hole for pinning to 3 holes on the extension post. The patent pending articulating mount can be moved for straight or 3 chevron angles. Geosynthetics have different elongations fabrics (high), GRIDS (low) and HYBRID MATS (low to medium) they require different angles or straight for the brushes. Each material requires some testing to get it right.

FABRIC INSTALL MULTIL-BAR TENSION AND ANGLED BRUSHES	OLD MOUNT 2 POSITIONS - CHEVRON ANGLE & STRAIGHT & ARTICULATING ROCKER	Z BAR POST WITH 3 HOLES FOR MOUNTING THE BRUSH BAR BRACKET REQUIRES WELDING TO ZBAR	NEW MOUNT COMPLETE WITH SLIDER & PIN FOR 3 CHEVRON ANGLES & STRAIGHT ARTICULATING ROCKER	NEW MOUNT SLIDER WITH 2 TABS FOR ARTICULATING MOUNT & PIN REQUIRES CUTTING OFF TABS	NEW MOUNT WITHOUT SLIDER WITH 3 HOLES FOR SLIDER
---	---	--	---	--	---

We offer all the above parts to upgrade you machine. Most machines only need the new sliding tube with tabs and pin hole and a pin. Your shop will need to cut off the back tabs and drill holes on the vertical post. One hole at the end for straight and two more for angles. We also sell the complete new part and you use your patent pending articulating mount. Shipping Is Additional UPS and Handling is \$20.00.

Patented Multi-Bar Tension System and Patent Pending Multi-Bar Roller System Front Sliders with Patent Pending Adjustment Radius. Permits pinning the slider in various positions from straight and fully or partially extended to various raised angles fully or partially extended for different geosynthetics and roll diameters. It prevents the front PVC Bar or Roller from dropping out of position under a increased loads exerted from heavier or more rigid GeoGrids, Composites and Hybrid Mats.

Set of 3 Laser Cut Radius with Holes for welding on to your front existing 3 PVC Sliders or or 3 front Roller Sliders. Complete front set of 3 PVC Sliders or 3 Roller Sliders and you reuse your existing neoprene bearings.

Rotating Spindle Roll Holder (RSRH) Improvements. Lubricatable heavier duty cast iron bearings. 2 inch longer patent pending 2 step 8 blade Cone for cardboard cores 2 1/4" to 5 1/4" with Keywayed Shaft and Key for Laser Cut Machined and Surfaced Discs. Older non hub discs require the replacement of both disc and shaft and cone. Brake pad replace kits and Complete replacement calipers.

Standard Tractor Mounts Included on All Grizzly 600T & Cub 300T Machines

New Optional Combination Tractor End Loader Mount and Clamp on Bucket Mount Replaces Tractor Mounts Older Cub Bucket Mount Replace Set

Grizzly 600T Weld onto Tractor Mount Bucket Clamp Set of 2 Upgrade

Optional Pin In Bucket Mounts Set of 2. Pins Into Tractor Mounts

LUBRICATEABLE HEAVIER DUTY CAST IRON BEARINGS

Machined Laser Cut Disc with Hub

Rotating Spindle Roll Holder Shaft and 8 2 Step Blades Cone 2 1/4"-5 1/4"

**Rotating Spindle Roll Holder Internal Brake Pad Kit
2 Pads, Pad Pin Hollow Trust Pin, Square Nut,
T-Handle Screw, 5 Washers**

**Rotating Spindle Roll Holder Complete Internal
Brake Assembly Caliper - Brake Pad Kit, Caliper
Arms, Spring, Assembled**
